

StudySync AI

AI-Powered Study Planning Platform

UI/UX Design Internship — Task 2

Problem

College students manage multiple subjects, deadlines, exams and study priorities.

Solution

An AI-powered study planning experience that prioritizes tasks, recommends what to study next and adapts the plan when progress changes.

Target user

College students who want simple, personalized academic planning.

Bhavya

Final Case Study

01 — Problem & AI Solution

The problem

Students often have to balance several subjects, assignments, exams and deadlines at the same time. A major challenge is deciding what to study first and maintaining a realistic plan when their progress changes.

The solution

StudySync AI turns academic workload into a personalized study plan. The experience uses subjects, deadlines, goals, available study time and progress to prioritize tasks and provide actionable recommendations.

Core AI capabilities

- AI-generated study plans
- Smart prioritization of subjects and topics
- Progress-based study recommendations
- Conversational AI study assistance
- Adaptive plan adjustment when the student falls behind

Design principle

AI should reduce decision-making effort while keeping recommendations understandable and actionable for the student.

02 — UX Foundation

User Persona — Ananya Sharma

20 years old · Engineering Student	Pain Points
Goals • Stay consistent with studying • Prepare effectively for exams • Manage multiple subjects and deadlines	• Doesn't know what to study first • Creates plans but struggles to follow them • Feels overwhelmed when exams approach
	Needs • Realistic study plan • Clear daily priorities • Adaptive guidance

User Journey

Discover	Wants help organizing studies	Overwhelmed by subjects and deadlines
Set Up	Adds subjects, exams and study time	Doesn't want complicated setup
AI Plan	AI analyzes information and creates a plan	Unsure whether the plan suits her
Study	Follows priorities and completes tasks	May fall behind
Track	Reviews progress and recommendations	Needs direction and motivation

Information Architecture

The product is structured around Onboarding, Dashboard, Study Plan, AI Assistant and Progress, with AI adjustment connecting recommendations back to the daily plan.

03 — AI Experience

The interface deliberately demonstrates multiple AI-specific states required by the internship brief.

Loading	AI plan generation communicates that the workload is being understood, prioritized and converted into a study plan.
Suggestions	The Dashboard and AI Assistant surface contextual prompts such as what to study next.
Confidence	The AI response communicates a high-confidence recommendation with a visible confidence indicator.
Empty state	The AI Assistant provides a ready state before a user starts a conversation.
Feedback	The AI response asks whether its recommendation was helpful.
Adaptation	The user can report falling behind and receive a modified study plan.

Visual system

The final mobile UI uses Inter typography, #1F2937 primary text, #6B7280 secondary text, #F8F9FC surfaces, white cards, #E5E7EB borders and #6366F1 as the primary AI/action accent.

Your AI Study Plan

Personalized around your goals, workload, and available time.

Today - Monday
5 tasks • 2 hrs 15 min

1 Data Structures
Arrays & Linked Lists

45 min

AI priority: High

2 Database Systems
SQL Queries & Joins

30 min

AI priority: Medium

3 Computer Networks
TCP/IP & Network Layers

40 min

AI priority: Medium

4 Data Structures
Trees & Graphs

30 min

AI priority: Medium

5 Database Systems
Normalization

30 min

AI priority: Low

Why this plan?

AI prioritized Data Structures because you're 72% through the topic and your exam is approaching

AI Study Assistant

Ask anything about your study plan.

Hi Ananya !
I can help you understand topics, prioritize what to study, or adjust your plan.

Try asking

What should I study next?

Explain linked lists simply

Adjust my study plan

What should I study next ?

AI
Based on your progress and upcoming deadlines, I recommend studying Data Structures next.
You're 72% through Arrays & Linked Lists, so finishing this topic will keep you on schedule.
AI Confidence : High · 92%
Was this helpful?
Yes No

Adjust Your Study Plan

Tell AI what's not working, and we'll adapt your plan.

What would you like to change ?

I'm falling behind

I need more time for difficult topics

I want a lighter daily workload

AI Adaptation

I can adjust your plan.

I'll reduce today's workload and move lower-priority tasks to tomorrow so that you can catch up without overloading your schedule.

New plan: 3 tasks today • 1 hr 45 min

Apply New Plan

05 — Prototype & Outcome

Main prototype flow

Welcome → Onboarding → Academic Profile → AI Plan Generation → Dashboard → AI Study Plan → Task Details → AI Assistant.

Additional prototype paths connect Dashboard → Progress & Insights → AI Feedback & Adjustment → Dashboard, and the AI Assistant includes a response/feedback state.

Outcome

StudySync AI combines planning, progress tracking and conversational AI into a focused mobile study experience. The product is designed to help students understand what to study next, why a recommendation was made, and how their plan can change when their workload changes.
